

# AgriNode Platform Brochure | 2026

---

## AgriNode Overview

AgriNode is a village agriculture intelligence platform connecting farmers, field agents, buyers, and admins. It provides one digital workflow for crop planning, finance tracking, market discovery, and government scheme access.

## Vision

To build a trusted data network that improves farm decisions and rural incomes in every district we serve.

## Mission

To give farmers timely market, weather, finance, and advisory information in their language through assisted digital tools.

---

## Core Features

- Farmer onboarding and KYC workflows with agent approval
  - Crop lifecycle tracking with expected and actual yield data
  - Finance dashboard for income, expenses, and seasonal profitability
  - Daily market price updates across major APMC mandis
  - Government schemes and loan support with status tracking
  - Admin command center with audit logs and export reports
- 

## Benefits for Farmers

- Better crop planning through data-backed recommendations
- Faster access to schemes, subsidies, and loan channels
- Higher selling confidence using daily mandi price references

## Benefits for Agents

- Streamlined farmer management and approval workflows
- Cleaner field reporting with export-ready records
- Better service quality through real-time support visibility

## Benefits for Admins

- Single view of platform operations and service quality
  - Traceable exports for compliance and audits
  - Data for village and district growth planning
-
